

Decisión relativa a la negativa de la Agencia Ejecutiva de Innovación y Redes (INEA) a conceder el acceso público integral a un documento relacionado con el proyecto de túnel de base Lyon-Turín (caso 465/2021/VB)

Decisión

Caso 465/2021/VB - Abierto el 16/03/2021 - Decisión de 27/01/2022 - Institución concernida Agencia Ejecutiva Europea de Clima, Infraestructuras y Medio Ambiente |

El caso hacía referencia a la negativa de la Agencia Ejecutiva de Innovación y Redes (INEA) a conceder el acceso público integral a una modificación de un acuerdo de subvención relativo al proyecto del túnel de base Lyon-Turín. La INEA argumentó que la divulgación completa del documento perjudicaría los intereses comerciales de las entidades implicadas en el proyecto y socavaría la privacidad e integridad de las personas.

A raíz de una inspección del documento solicitado, la Defensora del Pueblo consideró que existía un interés público superior en la divulgación de información relacionada con los retrasos en la finalización del proyecto. Por lo tanto, la Defensora del Pueblo propuso a la Agencia Ejecutiva Europea de Clima, Infraestructuras y Medio Ambiente (CINEA), que sucedió y sustituyó a la INEA el 1 de abril de 2021, que revisara su posición respecto a la solicitud del reclamante, con el fin de conceder un acceso público lo más amplio posible.

En su respuesta, la CINEA acordó ampliar el acceso concedido al documento, no sin antes advertir que una mayor divulgación socavaría la seguridad pública. También señaló que la excepción que protege la seguridad pública que contempla la legislación de la UE sobre el acceso público a los documentos es absoluta y no puede ser anulada por motivos de un interés público.

La Defensora del Pueblo observó que la Agencia no había invocado previamente la excepción que protege la seguridad pública y consideró insuficiente el razonamiento proporcionado por la CINEA a tal efecto. Por lo tanto, sugirió a la CINEA que proporcionara al reclamante una motivación adecuada que apoyara la aplicación de la excepción de seguridad pública.

Como respuesta, la CINEA aceptó proporcionar información adicional al reclamante. La Defensora del Pueblo considera que la información adicional es suficiente para determinar la razón por la que la CINEA se acogió a la excepción de seguridad pública. A la vista de esta información adicional, la Defensora del Pueblo también considera razonable que la CINEA

invoca la excepción de seguridad pública en este caso.

Como la CINEA aceptó seguir la sugerencia de la Defensora del Pueblo, esta dio por cerrado el caso y concluyó que no se justifican más investigaciones.

Background to the complaint

1. The Lyon-Turin railway link is a cross-border railway connection between France and Italy which includes a tunnel under the Alps. The project received EU funding, for a maximum amount of EUR 813 781 900, under the Connecting Europe Facility (CEF) Programme [1] for studies and works to be completed along the cross-border section of the project by the end of 2019. In 2020, the grant agreement was amended to extend its duration by 36 months to complete the activities that were delayed.
2. In December 2020, the complainant, an organised group that opposes the project, requested public access to the amendment to the grant agreement ("the amendment").
3. On 4 January 2021, the European Innovation and Networks Executive Agency (INEA) granted partial access to the amendment. It argued that disclosing the remaining parts could undermine the privacy and integrity of individuals [2] and the commercial interests of the parties concerned by the agreement [3]. In particular, INEA did not disclose the indicative start and end dates of the project's activities and information related to the milestones of the project, which INEA uses to monitor and verify beneficiaries' compliance with their obligations under the grant agreement.
4. The complainant requested INEA to review its decision, by making a 'confirmatory application'. It considered that the information disclosed was not sufficient for the public to follow the project's progress.
5. On 22 February 2021, INEA confirmed its initial decision to grant only partial access to the document. It reiterated its views that additional disclosure would negatively affect the commercial interests of the entities involved in the project and undermine the privacy and integrity of individuals whose personal data are included in the document. INEA also consulted the national authorities, in line with EU access to document rules [4], which objected to further disclosure of the document.
6. Dissatisfied with INEA's decision, the complainant submitted a complaint to the Ombudsman.

The Ombudsman's proposal for a solution

7. On 16 March 2021, the Ombudsman's inquiry team asked to inspect the document in question, as well as the documentation on the consultation of Member State authorities.

8. On 1 June 2021, based on an analysis of the inspected documents, the Ombudsman proposed a solution to the European Climate, Infrastructure and Environment Executive Agency (CINEA), which succeeded and replaced INEA on 1 April 2021.

9. In her solution proposal, the Ombudsman considered that there was an overriding public interest in disclosure of the information related to delays in completing the project. She noted that the Lyon-Turin base tunnel project is a large-scale infrastructure project, which received funding in order to be built within a certain timeline. The delays that led to the extension of the deadline for the project's completion arguably affect the public. By making public the adapted timeline, the public would be in a position to monitor the implementation of the project and check whether and why delays are occurring.

10. In view of these considerations, **the Ombudsman proposed to CINEA to review its position on the complainant's public access request, with a view to granting the widest possible access to the amendment.**

11. In reply, **CINEA agreed to grant wider public access to the document**. It agreed to disclose the past dates of activities and milestones already carried out and most of the information about the project's milestones.

12. However, CINEA maintained the Agency's position regarding the disclosure of sensitive future dates and of past dates that could reveal the timing of future ones. CINEA also invoked an additional exception under the EU's rules for access to documents, namely that disclosure of the remaining dates would undermine public security [5].

13. The complainant commented on CINEA's reply that it was not satisfied with the additional information disclosed. It considered that, as most of the additional information is related to past dates, the public is still not in a position to monitor the implementation of the project. The complainant also questioned how the disclosure of additional dates could undermine public security.

The Ombudsman's further inquiries

14. The Ombudsman's solution proposal was based on the existence of an overriding public interest in disclosure of certain information contained in the amendment to the grant agreement. The public security exception, which CINEA invoked in reply to the Ombudsman's solution proposal, is absolute and cannot be overridden by a public interest in disclosure.

15. The public security exception was not previously relied on by the Agency in its initial and confirmatory decisions on the complainant's request for public access. This is regrettable. Had the Agency relied on the public security exception at an earlier stage, the complainant would have had a better understanding of the reasons for the non-disclosure of certain parts of the document. In the context of future access requests, CINEA should ensure that it refers to all

applicable exceptions in its decisions on access requests.

16. Institutions have a wide discretion in determining whether the disclosure of a document would undermine public security. [6] That said, the public security exception has to be supported by an appropriate statement of reasons, which has to be sufficient for the complainant to ascertain the reasons for the refusal and for EU courts to exercise their power of review [7].

17. The Ombudsman considered that the reasoning provided by CINEA in its reply to the Ombudsman's proposal for a solution was not sufficient for the complainant, or for the Ombudsman, to understand how further disclosure of the document would undermine public security.

18. The Ombudsman therefore suggested to CINEA that it **should adopt the decision to grant wider public access to the document, as agreed in reply to the solution proposal, and include an appropriate statement of reasons supporting its reliance on the public security exception.**

19. On 30 November 2021, CINEA replied to the Ombudsman's suggestion. It also shared with the Ombudsman a draft decision addressed to the complainant on the disclosure of the requested document.

20. In its reply, CINEA agreed to even wider disclosure of the document. In the draft letter to the complainant, CINEA explains that the disclosure of additional dates could lead to situations, which, as in the past, could threaten the progress of the project and undermine security measures protecting the worksite and workers.

The Ombudsman's assessment after her suggestion

21. The Ombudsman welcomes CINEA's positive reply to her suggestion. By including an explanation of how full disclosure of the document could undermine public security in the decision that CINEA proposes to send to the complainant, CINEA followed the Ombudsman's suggestion.

22. The Ombudsman is aware that the implementation of this project was accompanied by protests, some of which were characterised by episodes of violence that led the Italian authorities to adopt measures aimed at securing the worksites. In light of this, the Ombudsman considers that it is reasonable for CINEA to invoke the public security exception in this case. The Ombudsman trusts that CINEA will now send the proposed letter to the complainant. In view of this, no further inquiries are justified at this stage.

Conclusion

Based on the inquiry, the Ombudsman closes this case with the following conclusion:

By including an explanation of how full disclosure of the document could undermine public security in the letter that CINEA proposes to send to the complainant, CINEA followed the Ombudsman's suggestion. The Ombudsman considers that it was reasonable for CINEA to invoke the public security exception in this case. Therefore, no further inquiries are justified at this stage.

The complainant and CINEA will be informed of this decision .

Emily O'Reilly European Ombudsman
