Subject Ombudsman Consultation on Scientific Committees

AIMS is an experienced pressure and support group, run entirely by volunteers, established in 1960.

We run a national help line for the UK, offering support and information to callers and those who contact us by email and post. The changing pattern in these calls often alerts us to new problems before they appear in the medical press or elsewhere.

Over the years we have assisted thousands of parents who have legitimate complaints about the standard of care they have received. We have given evidence to Select Committees and government, are stakeholders in many NICE consultations on medical care, work with the Confidential Enquiries into Maternal and Infant Deaths, and so on.

Content

We have followed the EU rules on transparency and independence relating to the scientific advice provided to the EU on products marketing for infants and young children and are dismayed that these rules have been weakened as a result of faulty procedures and the excessive influence of commercial companies.

We wish to record our full support for Baby Milk Action's response to the Ombudsman Consultation.
